AREA OF INTEREST

Adaptive AI Agents | Full Stack Development | Data Analysis and Machine Learning Applications | New Product Development | Supply Chain and Operations Management | Process Planning

EDUCATION

PSG College of Technology <i>Bachelor of Engineering in Production Engineering; CGPA: 6.8</i>	Coimbatore, Tamil Nadu 2022 – 2026
VCV Govt. Higher Secondary School <i>Higher Secondary Certificate; Tamil Nadu State Board – 89%</i>	Tamil Nadu 2021 – 2022
GHS Saravanampatti <i>Secondary School Leaving Certificate; Tamil Nadu State Board – 79%</i>	Tamil Nadu 2019 – 2020

EXPERIENCE

Member Technical Staff Intern <i>Haiva Software Pvt Ltd</i> - Developed and contributed to Adaptive AI Agent solutions for the Haiva platform. - Contributed to workflow automation, performance dashboard building, UI development, and API integrations. - Collaborated with cross-functional teams, took ownership of assigned tasks, and delivered work within timelines.	Jan 2026 – Mar 2026
Freelance Full Stack Developer <i>eDrift Electric Pvt. Ltd.</i> - Designed, developed, and maintained the complete corporate website for eDrift Electric, an EV power electronics company. - Built responsive user interfaces, product pages, company profile pages, and contact workflows to improve user engagement and lead generation. - Implemented modern frontend development practices with a focus on performance, responsiveness, SEO, and user experience. - Collaborated directly with founders and engineering teams to translate business requirements into production-ready web solutions. - Managed website deployment, updates, content integration, and ongoing maintenance throughout the project lifecycle.	Mar 2026 – May 2026 <i>Remote</i>
Frontend Lead <i>Kriya Techfest, PSG College of Technology</i> - Led the frontend engineering team responsible for developing and maintaining the official Kriya 2025 and Kriya 2026 techfest websites. - Built scalable and responsive web interfaces, improving participant onboarding, event discovery, and registration workflows. - Implemented modern UI/UX practices and collaborated with cross-functional teams to deliver production-ready web applications. - Managed deployment, testing, performance optimization, and feature enhancements for the Kriya technical festival websites.	June 2025 – May 2026 <i>Coimbatore</i>
Head <i>Open Learning Laboratory, Department of Production Engineering</i> - Managed lab resources and supported student technical projects in robotics, automation, and product development. - Guided students in building practical projects and participating in technical events.	Jun 2025 – May 2026 <i>PSG College of Technology</i>

PROJECTS

Optimization of FDM Process Parameters using Machine Learning	Jul 2025 – May 2026
- Developed CAD models and designed experiments using RSM–CCD for FDM process optimization. - Developing and validating a machine learning-based multi-objective optimization model to determine optimal FDM process parameters.	
PSG Lab Equipment Tracking System <i>Web Development, Inventory Management</i>	Nov 2025 – Apr 2026
- Developed a lab equipment tracking system to manage and monitor laboratory assets across departments. - Implemented role-based access for Principal, HOD, and Lab Assistants with department-wise equipment tracking.	
Digital Twin for Raw Material Traceability <i>Digital Twin, Dashboarding</i>	Oct 2025
- Built a digital twin model to visualize raw material flow in manufacturing systems. - Designed dashboards for real-time sensor data and process KPIs to improve supply chain visibility.	
Lean Manufacturing Implementation in FMCG Industry	Apr 2025
- Applied VSM, 5S, Kaizen, 7 QC Tools, Pareto analysis, and Fishbone analysis in a small-scale bakery. - Improved production flow, reduced lead time and cycle time, and achieved OEE improvement to 56.26%.	
Shipment Delivery Time and Delay Prediction using Machine Learning	Apr 2025
- Built ML models using Linear Regression, Decision Tree, and Random Forest to predict shipment delay. - Achieved best performance using Random Forest after data cleaning, feature engineering, and model evaluation.	
Pneumatic Sorting Mechanism with Machine Learning <i>ESP32, Sensors, Actuators</i>	Nov 2024
- Designed an automated pneumatic sorting system using sensors, actuators, and ESP32 microcontroller. - Integrated machine learning to classify items and improve sorting accuracy.	

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, SQL
Frontend: Angular, React.js, Tailwind CSS, HTML5, CSS3, Responsive Web Design
Backend: FastAPI, REST APIs, Supabase, Authentication, API Integration
Databases: PostgreSQL, Supabase, MySQL
AI & Machine Learning: Scikit-Learn, Pandas, NumPy, Random Forest, Decision Trees, Data Preprocessing, Feature Engineering, Model Evaluation, Adaptive AI Agents, Agentic Systems, Prompt Engineering, LLM Integration
Developer Tools: Git, GitHub, VS Code, Postman, Google Colab
Deployment & Platforms: Vercel, Supabase, GitHub Pages, Google Workspace

COURSES AND CERTIFICATIONS

Machine Learning A–Z: AI, Python and R <i>Udemy</i>	Ongoing
Introduction to Frontend Development <i>Meta, Coursera</i>	Mar 2024
Foundations of Cybersecurity <i>Google, Coursera</i>	Feb 2024

ACHIEVEMENTS AND ACTIVITIES

- Secured First Position in Robot Premier League 2023 conducted by Open Learning Laboratory. - Secured First Position in ROBOSUMO at ROBOGLITZ 2K24 and Second Position in Race to Scan at ROBOGLITZ'25. - Runner-up in TECHNOMAZE at Srishti 2K24 and Second Position in Robo Evade at PRODOTHON'25. - Participated in Micro Mouse Maze and multiple robotics events at Shaastra, IIT Madras. - Contributed to designing and fabricating two robots for DD-Robocon 2024 organized by IIT Delhi.
